JULLIANE PAMFILO

Software Engineer

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience owning and shipping production-grade software systems across the full stack. Proven background in frontend architecture, backend APIs, cloud deployment, and applied AI workflows, including Retrieval-Augmented Generation (RAG). Extensive hands-on experience with React, TypeScript, Node.js, Python, and modern cloud platforms such as AWS and Vercel. Known for operating effectively in high-ambiguity environments, making system-level architectural tradeoffs, and delivering performant, maintainable software used by real customers.

SKILLS

Programming Languages - TypeScript, JavaScript (ES6+), Python, Java, C++,

Frontend & Application Architecture - React, Next.js (App Router), Component-driven architecture, State management patterns, Performance optimization for state-heavy UIs,

Backend & Systems - Node.js, RESTful API design, Serverless functions, Authentication & authorization (JWT, role-based access),

Cloud, Infrastructure & Deployment - AWS (EC2, S3, IAM), Serverless and edge-based architectures, Vercel (CI/CD pipelines, environment configuration, edge functions),

Data & AI Systems - SQL fundamentals, NoSQL concepts, Data modeling, Retrieval-Augmented Generation (RAG), LangChain, LLM-powered personalization,

Systems & Tooling - Linux, Git (branching strategies, code reviews).

ADDITIONAL INFORMATION

CUSTOM SHOPIFY SNEAKER MARKETPLACE – "OUT OF STOCK"
Sneaker Consignment & Drop Platform

- Engineered and owned a high-performance custom Shopify storefront, implementing advanced filtering logic, category remapping, and real-time product drop workflows.
- Designed and integrated email automation and fraud prevention logic (billing–shipping enforcement), improving transaction integrity and checkout reliability.
- Collaborated directly with brand stakeholders to translate business requirements into a polished, production-ready UX/UI optimized for mobile-first traffic.

EVENTS BY MAU – EVENT PLANNING WEBSITE WITH GLASSMORPHISM UI
Client-Facing Production Website

- Designed and developed a production Next.js application showcasing event decor services, emphasizing performance, responsiveness, and modern UI patterns.
- Implemented dynamic image galleries, theme-aware light/dark mode, and reusable UI components using Tailwind CSS and Framer Motion.
- Delivered a fully branded client solution, including contact flows, service discovery, and social media integration.

INVOICEGEN – PDF INVOICE AND RECEIPT GENERATOR
Lightweight SaaS-Like Utility

- Built a client-facing invoicing system enabling structured service input, pricing calculation, and export-ready PDF generation.
- Integrated Stripe for billing workflows and real-time invoice preview using Next.js and React-PDF.
- Designed a clean, responsive UI suitable for freelancers and small businesses.

OLA ELECTRIC WEBSITE REDESIGN
International Product Platform

- Contributed to the modernization of a production web platform supporting next-generation electric scooters, migrating from static HTML to a React-based architecture.
- Improved maintainability, responsiveness, and performance through component-driven design and modern frontend practices.
- Collaborated with a distributed, international engineering team operating in a live production environment.

EMPLOYMENT HISTORY

FOUNDING ENGINEER — **Oct 2025 - Present**
DADO — ***Remote***

- Own end-to-end frontend and full-stack architecture for a social gifting and luxury commerce platform, building production systems in React, TypeScript, Node.js, and Python.
- Designed and implemented scalable UI and application architecture for complex, state-heavy user flows, balancing performance, maintainability, and development velocity.
- Integrated AI-powered personalization using Retrieval-Augmented Generation (RAG) and LangChain, enabling context-aware recommendations within live user workflows.
- Led architectural decision-making under startup constraints, evaluating tradeoffs across scalability, cost, and developer experience.
- Collaborated cross-functionally with design, product, and leadership to translate ambiguous requirements into production-ready systems.
- Contributed to early technical hiring, code review standards, and engineering best practices to support platform growth.

SOFTWARE DEVELOPMENT INTERN — **Sep 2023 - Jan 2024**
Ola Electric (Syndicate Group of Companies)

- Collaborate with international team to develop scooter web app using React, TypeScript, Node.js.
- Design, implement, and test key website features to enhance user experience and efficiency.
- Optimize website performance and functionality in collaboration with development team.

INFORMATION TECHNOLOGY FIELD TECHNICIAN **Dec 2024 - Jan 2026**
Quattris IT Services | Contract ***Chicago***

- Prepared, validated, and tracked IT hardware for deployment in enterprise logistics operations.
- Verified inventory accuracy and compliance with operational standards.

ASSOCIATE MANAGER PT **Dec 2024 - Dec 2026**
Tumi ***Schaumburg***

- Analyzed sales and inventory data to inform operational and merchandising decisions.
- Diagnosed and resolved POS and network issues to minimize downtime and maintain operational reliability.
- Streamlined inventory reconciliation workflows, reducing discrepancies and improving order accuracy.
- Led and supported team operations in a high-throughput retail environment.

CLIENT ASSOCIATE **May 2022 - Sep 2025**
TravisMathew Apparel ***Schaumburg, IL***

- Resolve network and POS issues swiftly to ensure seamless operations and customer satisfaction.
- Conduct technical troubleshooting to minimize downtime and maintain optimal system performance.
- Assist with stock counts and report discrepancies to enhance inventory accuracy.

EDUCATION

BACHELORS IN SOFTWARE ENGINEERING **Jul 2024 - Feb 2026**
Southern New Hampshire University ***Manchester***

3.9/4 GPA

FULL STACK ENGINEER BOOTCAMP CERTIFICATION **Jan 2023 - Sep 2023**
Coding Dojo

SOFTWARE ENGINEERING **Aug 2021 - Sep 2022**
Loyola University of Chicago ***Chicago***
